

THE KALAMAZOO FLYING SAUCER STUDY CLUB BULLETIN NO. 13- NOVEMBER 1957

BENDER SPEAKS

For the first time since 1953, Albert K. Bender of the International Flying Saucer Bureau has broken silence which has been widely publicized by Gray Barker's book THEY KNEW TOO MUCH ABOUT FLYING SAUCERS.

WHEN THE TRUTH IS KNOWN is the title of a specially written article in the November issue of FLYING SAUCERS from other worlds now on the news-stands. He still says very little, but if you are good at reading between the lines you may be able to arrive at some sort of answer. He hints of disaster but offers advice to all researchers to continue in the search for the answers to the UFO enigma and to have faith in what you are doing. Get the November issue.

Next issue of FLYING SAUCERS from other worlds will be on sale Dec. 1st. dated Jan. 1958. Buy your magazine at the same newsstand.

NEW BOOKS

The following publications are listed here for information only and are not necessarily endorsed by the editor of the KFSSC BULLETIN.

OTHER TONGUES- OTHER FLESH, by George Hunt Williamson. In more recent times, there has been a growing realization that on other worlds than ours, even in other universes, there are other living beings. The idea that earthbound man may someday journey into the heavens to discover other men and women, like or unlike himself, grows by leaps and bounds. Within man's soul lies the truth- mortals exist on other spheres!

Here is a book that brings home this tremendous fact with a dynamic force and sweep that will astound the reader, and convince him beyond all doubt. Here is a HISTORY, a collection of PROOF, and a tremendous THEORY.

While man in his heart knows that other worlds are also inhabited, he is reluctant to admit that Earth is only one small house of the "many mansions" in the father's house. But the truth stares him in the face, and now, having arrived at a place in his civilization where only Truth will be able to survive, it has become necessary to reaffirm and establish three truths: (1) Science and religion are one and the same thing; (2) The entire universe is magnetic in nature, and even culture is influenced by the laws of magnetism; (3) Space visitors, mentioned in the Bible and ancient mythology, have been coming to Earth throughout the ages, and are now making themselves known to aid mankind in entering a New Age.

In this book, many references and quotations are given from the latest authentic reports on Saucer phenomena. Because many believe there are contradictions in some of the reported happenings, it has been necessary to show that there is a great story and purpose behind all these experiences.

Here, in this book, is the history of OTHER TONGUES and of OTHER FLESH; calm, scientific evidence that there are brothers of ours in the skies overhead. We are not alone in the Universe!

STRANGEST OF ALL, by Frank Edwards. --A storehouse of the incredible. In addition to his material on flying saucers in the book, Frank Edwards, master radio and TV commentator discusses such topics as these:

- Is it possible for a human being to walk off the face of the earth?
- Do "dead men tell no tales?"
- Can animals talk?
- Can a man be swallowed by a whale and live to tell the story?

In "Strangest of All" you'll meet horses that do cube root. You'll puzzle over the strange disappearance of Oliver Larch. You'll learn of Albert Crosse, the amateur scientist who stumbled on a way to create life. You'll follow the last exile of Napoleon and wonder if indeed it was the Little Emperor who died on St. Helena in 1821.

And of course, you'll read about "Flying Saucers and the Brass Curtain" and "Signals from Space"--all told in the unique factual style of one of America's master reporters--a man whose silence the brass tried to buy. 220 pages \$3.50 or FREE with 1 year subscription to FATE Magazine. Order from Frank Edwards, FATE Magazine, 806 Dempster Street, Evanston, Ill.

FATE Magazine. FATE is important to all persons interested in flying saucers. It was the first National magazine to publish the story of the first modern UFO sighting way back in the Spring of 1948 written of course by Ken Arnold. Since then FATE has led in flying saucer reporting and recently it has increased its coverage markedly. One year subscription \$3.50, see offer above.

U.F.O INVESTIGATOR, published by the National Investigations Committee on Aerial Phenomena. Since 1950 the Air Force has kept thousands of authentic UFO reports from the public. While we believe we know their reasons, we are convinced that Americans have a right to the truth. To that end, NICAP has set up a nationwide network -- soon to be worldwide--for reporting UFO sightings and hidden developments.

All this information--uncensored is revealed to NICAP members in a monthly magazine and in confidential bulletins. The magazine includes dramatic, authentic sightings by veteran pilots and other competent witnesses; behind-the-scene stories of the Air Force secret investigation; proof of the censorship which has muzzled hundreds of pilots; the pro's and con's of the question, "Is there life on Mars?" and special articles on the UFO problem and our own space-travel plans. In addition, NICAP will hold public hearings on claims of contacts with spacemen--to expose hoaxes and also to ferret out the facts.

You may become a Associate Member of NICAP for an annual fee of \$7.50 and receive the UFO Investigator and the special bulletins, and become part of our large reporting network. Most important of all you will be playing a vital role--not only in aiding to end the censorship--but in helping to find all the answers to the UFO mystery.

(Your Editor highly recommends your support of this worthwhile "Voice" in Washington. Your help is needed, join today with the attached membership subscription application) \$7.50 NICAP 1536 Conn.Ave. Washington 6 DC

## ROSE PHILLIPS TO SPEAK AT NOVEMBER MEETING

The next regular meeting will be held on Friday, November 22nd., at 8:00 P.M. in the conference room of the Crosstown Parkway Branch of the First National Bank, northwest entrance.

The speaker on the program will be Mrs. Rose Phillips of Detroit. Mrs. Phillips is a member of the Detroit UFO Research Group which operates within the Associated Research Center, and is on the staff of the VISITOR. She has written several articles including The Aquarian Age and an account of her trip to Mexico and the Southwest in which she tells of her personal visits with George Adamski in Mexico, Truman Bethurum in Arizona, Buck Nelson in Missouri and other UFO personalities. She is well qualified to give an accurate account of her investigations of the many contact claims. She also has been vitally interested in the organizational and programing needs confronting UFO groups.

## THE FLAP

In recent weeks there has been a flurry of UFO incidents reported in the newspapers, on T.V., and over the radio. As usual the Powers?? that be are again debunking not only the recent sightings but all those of the past ten years. They are explained as being Planets, Weather balloons, mirages, etc., If, as they say, they can all be so simply explained we wonder why there are so many simple?? explanations for the same sightings or rather incidents.

There is some thought that Flying Saucers researchers should speak out now in defense of their findings, should we assume the defensive such as apparently is being displayed by the Air Force, or continue in a positive objective study into the true mystery that exists?

## HELP!! !

Wanted a Mimeograph machine in a permanent location. One of the most pressing problems in our organization is the printing of the Bulletin. At one time it was discontinued. Our group interest dropped to near absolute zero (outer space term). We think that the best interests of the group lie in the continuance of the Bulletin which while primarily notifies of meetings is a great source of reference material reports and news. We would like to expand and bring you an even finer Bulletin, but to do so under the present conditions would entail a hardship. If someone with a mimeograph machine in a permanent location or a person who has the use of a machine would volunteer their services this would be of great help. Also needed is a typist with typewriter to cut stencils, volunteer reporters, help in assembling, stapling, folding, stamping and addressing, etc. If you would like to participate in any way please contact your editor, Bill Maier- FI 4-8679

## FIERY OBJECT SEEN IN SKY OVER STATE

PETOSKEY, Mich., Oct. 30 (AP)- A meteor-like object heading southwest across the sky was spotted last night by residents of Petoskey, Harbor Springs and Charlevoix.

The first report of the object came in about 6:15 p.m. Undersheriff Richard Zink of Petoskey described as having "fuzzy" edges and changing in color from a bright gold to dark red, orange & yellow.

## Board Meeting-- October 15, 1957

At this meeting it was decided to formalize our organization, to the extent that officers have specific titles and duties.

Bill Maier will remain in the office of chairman, chairman of the Board and the editor of the Bulletin.

John Brinson emergency vice-chairman and program chairman.

Pat Kuplicki is the official hostess. Her duties will include greeting people at the door, and introducing new-comers to some other member, also opening & closing the meeting place, placement of chairs - props etc.

Rae Simbulan will be Secretary & Treasurer.

Ramiro Besada will be in charge of our newly established library. He will keep a book box, which he will take to meetings, for the convenience of members who wish to borrow books. It was decided that books, periodicals, and other reading matter may be borrowed at meetings, with no charge. The loaning period is the time between meetings, and a fine of 3¢ a day will be charged on delinquent books. The librarian will also keep a scrap book of clippings and news items, concerning U.F.O. and related subjects. This will not be loaned. Other duties include keeping a file of literature on new publications, book reviews at meetings, upkeep of bulletin file. Address for returning books between meetings is at the home of Ramiro Besada, 138 E. Patterson St. Phone FI 5-3209.

Robert Lowell is in charge of a new tape library. He is in charge of obtaining tapes of interest to our group and making them available to members. The librarian will furnish tapes for regular meetings, special meetings, and to members who have access to tape recorders (the library will not rent or loan a tape recorder.) Tapes will be available at the home of the librarian at 510 Terrace Court, Phone FI- 2-2162. Loaning periods will be arranged at the discretion of the librarian. We discussed the possibility of tape parties in private homes, whereby members could invite their friends to their homes to listen to tapes.

From now on, there will be a fixed date for meetings. Regular meetings will be held on the 4th Friday of each month. (subject to change in case of speakers from out of town or interfering holidays.) There will be no regular meeting planned in December. Board meetings will be on the Thursday following regular meetings.

It was agreed to take steps to improve meetings. Mr. Brinson will try to keep the program time to approximately 1 hour, with one half hour discussion period to follow. Programs are to consist of speeches, tapes, book reviews, tape reviews, or combinations of any of these.

## TELLS OF SEEING STRANGE OBJECT IN NIGHT SKY

November 6, 1957

Elwood E. Singrey, 818 Gayle Ave., had something more unusual than a Sputnik to report Tuesday evening. Singrey said he was driving from his residence to the 1119 Riverside Drive home of Miss Lavonne Roe at 7:15 P.M. when he noticed a "blueish-like, overgrown star" drop to tree top level in the southern sky. After picking up Miss Roe, Singrey said the couple spotted the object again in the same area. He speculated it might have been a "flying saucer" or other mysterious flying object such as was reported in the Southwest Monday and Tuesday. Kal. Gazette

## PROGRAMING

Better program! That must be the answer ! But, how long can any group keep up with so-called better programs just to return attendance? Better programs create better entertainment ! and when that drops, so does the attendance;

It may be possible that the majority cannot create a greater and better group activity but I believe that is the very few, who consistently strive for better ways and new techniques and adaptations, who will eventually draw from the majority the interests because they have shown the way.

The main function of the Kalamazoo Flying Saucer Study Club is the promotion of knowledge . Groups that depend only upon devising "interesting or entertaining" programs must inevitably fail because it is impossible to entertain at all times, even if you can increase the attendance in the beginning! We cannot show the path to follow! We have our own problems on that score! But, at least we are trying.... and we don't intend to quit!

## JOHN BRINSON NEW STATE CHAIRMAN

The last meeting of the Michigan Flying Saucer Federation was held on October 26, 1957 at the home of Mr. & Mrs. Arthur Ingersol, 150 Long St., Michigan Center, Mich.

John Brinson of Kalamazoo was chosen to fill the unexpired term of office of Chairman of the Dederation. He succeeds Earle Maier.

The official minutes of the meeting are not yet available. They will be read at the Kalamazoo meeting if they arrive by that time.

Mrs. Ingersol served dinner to the Federation delegates. Informal discussion and general gab-fest was held after dinner.

## JOTTING TYPE ADS TO BE ACCEPTED

Should anyone care to place a small advertisement in the Bulletin, we would be happy to run it on a contribution basis. The Bulletin is non-profit and no set charges can be made.

TEN YEAR HISTORY of flying saucers, by John McCoy, 16 pages, 10¢ Available at meetings or write UFO, 2233 Cambridge Drive, Kalamazoo.

## BOOKS WANTED

Our library would welcome any contributions of books, periodicals, clippings or pamphlets to increase our circulation of reading matter. If you have any books that you do not care to keep for reference please bring to the next meeting or contact the librarian.

????????????????????

SKYCHOLOGY (skī-kōl'ō-jī<sup>u</sup>) That branch of knowledge which deals with the mind in space; mental science of space.

????????????????????

There is no charge for this bulletin and it is solely supported by voluntary contributions and labor. It is sent for the purpose of notification of the next meeting of the group and for bringing you other notes of new developments which you may wish to use for reference. It is mailed to those who request it within driving distance of Kalamazoo who care to attend our meetings. Those who do not attend meetings or show sufficient interest after several months duration will automatically be dropped from the mailing list.

The Bulletin is not for general, national or international distribution nor intended to compete with existing publications, but rather to supplement and further their cause. When we borrow material from other publications, we acknowledge the source and do so that the reader can refer to that publication for more complete information. However it is sent out on an exchange basis with those publications who so desire. E. W. Maier, Editor.
